Table of Contents

Preface	13
Natural Resources and Pro-Poor Growth: The Economics and Politics	15
Executive summary	16
Introduction to Part I: Overview of key issues	16
Introduction to Part II: Key natural resources for pro-poor growth	20
<i>Part I</i>	
Overview of Key Issues	
Chapter 1. Introduction	25
Notes	27
Chapter 2. Some Unique Features of Natural Resources	29
2.1. The varied forms and functions of natural capital	30
2.2. Measuring and monitoring natural resource stocks	30
2.3. The natural resources “curse”	31
Note	33
Chapter 3. The Economics of Sustainable Natural Resource Management	35
3.1. Overview	36
3.2. Natural capital contributes directly to incomes, employment and fiscal revenues	37
3.3. Natural resources underpin the livelihoods of many among the poorest.	38
3.4. Natural resources provide a safety net in times of crisis.	40
3.5. Natural resources generate a wide range of positive externalities at the national and global levels	41
3.6. Sustainable natural resource management raises unique challenges	41
3.7. Converting natural resources into other forms of capital: Some key issues. . .	45
3.8. Natural resource management in support of pro-poor growth: Key approaches .	49
Notes	54
Chapter 4. Politics of Natural Resources	55
4.1. Key factors for natural resource management	56
4.2. Policies and measures for pro-poor, sustainable resource governance.	63
4.3. Managing the policy process: Political change in support of pro-poor natural resource management.	66
4.4. Conclusions.	68
Notes	69

Chapter 5. Conclusions and Recommendations for Policy Makers	71
5.1. Conclusions	72
5.2. Recommendations	73
Notes	78
Checklist for Practitioners	79
Socio-economic aspects of natural resource management	79
Capacity and governance for natural resource management	80
 Part II Key Natural Resources for Pro-Poor Growth 	
Chapter 6. Fisheries for Pro-Poor Growth	83
6.1. Overview	84
6.2. The contribution of fisheries towards growth and the economy	84
6.3. What role can fisheries play in lifting people out of poverty?	89
6.4. The politics of sustaining pro-poor fisheries	92
Notes	94
Chapter 7. Forestry for Pro-Poor Growth	95
7.1. Overview	96
7.2. Contribution of forests towards growth and the economy	96
7.3. What is the potential for forests to lift the poor out of poverty?	98
7.4. The politics of increasing the role of forests to promote pro-poor growth . . .	102
Chapter 8. Wildlife and Nature-Based Tourism for Pro-Poor Growth	105
8.1. Overview	106
8.2. Wildlife and poverty: Safety nets and wealth creation	106
8.3. Contribution of nature-based tourism towards growth and the economy . . .	107
8.4. What is the potential for nature-based tourism to lift the poor out of poverty? . .	108
8.5. Trophy hunting	112
8.6. The politics of increasing the role of nature tourism to promote pro-poor growth	113
8.7. Wildlife trade	113
Notes	115
Chapter 9. Soil Productivity and Pro-Poor Growth	117
9.1. Overview	118
9.2. The contribution of soil management to growth	119
9.3. Policies and measures to encourage improved soil management	121
Chapter 10. Water Security and Pro-Poor Growth	123
10.1. Overview	124
10.2. The potential contribution of water resources management to pro-poor growth	126
10.3. Ensuring responsible water management	129
10.4. The politics of water management to promote pro-poor growth.	131
Chapter 11. Minerals and Pro-Poor Growth	135
11.1. Overview	136
11.2. The economics of mining	137

11.3. Environmental impacts of mining.	138
11.4. What is the potential for mining to lift the poor out of poverty?	139
11.5. The politics of increasing the role of mining to promote pro-poor growth . . .	142
Chapter 12. Renewable Energy and Pro-Poor Growth.	145
12.1. Overview	146
12.2. Recent trends in renewable energy: Renewables on the rise	146
12.3. What role can renewable energy play in supporting pro-poor growth?	150
12.4. Policies and measures for harnessing the potential benefits of renewable energy.	152
12.5. Conclusion	156
Notes.	157
Bibliography	159

Boxes

1.1. Climate change: The expected impacts on developing countries	27
3.1. Pro-poor growth.	36
3.2. Some examples of accounting for informal forestry activities in national income accounts	39
3.3. Importance of watersheds for urban electricity in Africa	41
3.4. Payment for watershed preservation services	44
3.5. Political priorities on the management of natural resources determine the optimal rate of exploitation	44
3.6. Hartwick's rule and Hotelling's rule	45
3.7. Genuine net saving: An indicator to assess overall capital stock	46
3.8. Natural resources and the poor in India and Uganda	49
3.9. Rising shrimp prices in Madagascar.	52
3.10. Growing demand for "fair trade" and environmentally certified products	52
4.1. Clash of formal and informal land use rules.	62
4.2. Fisheries livelihoods dominated by the elite in Bangladesh.	62
4.3. Participatory forest management in Himachal Pradesh, India: Benefit flows and distribution.	65
4.4. Mining.	65
4.5. South Africa's water laws and their implementation	67
6.1. Aquaculture has rapidly gained economic importance, but is not necessarily pro-poor	85
6.2. Economic role of the fisheries sector in Bangladesh	88
6.3. Hard bargaining for public revenues from foreign fishers: Successes in Africa.	90
6.4. Improved fishery management and increased rent capture in Namibia	91
6.5. Promoting growth of the Madagascar shrimp industry.	92
6.6. Pro-poor growth in South Africa's hake fishery	93
6.7. Trawler bans in Kerala: Mobilisation of marginal fishermen to demand pro-poor growth.	94
7.1. Outgrower schemes in South Africa (2000)	100
7.2. Can forest conversion be economically beneficial and pro-poor?	101
7.3. The potential for harnessing carbon markets to support forestry development.	101

7.4.	Bolivia is a world leader in certified timber.	103
7.5.	Extractivist reserves in Brazil: Sustaining pro-poor growth	104
8.1.	Pro-poor growth in Indian protected areas	110
8.2.	Trophy hunting in Tanzania	112
9.1.	Conservation agriculture	120
9.2.	Investing in soil management in North China and in Niger.	121
10.1.	Hostages to hydrology	125
10.2.	Irrigation water and economic growth in India: Successful investments in water resource management help India cope with climate variability	128
10.3.	Valuing the Zambezi's wetlands as an infrastructure alternative.	130
10.4.	Pakistan and water problems	130
10.5.	South Africa's water laws and their implementation	132
10.6.	Importance of urban tenure for water supply: The example of Guatemala	133
11.1.	Diamond mining in Sierra Leone	140
11.2.	Artisanal mining in the Democratic Republic of the Congo (DRC).	141
11.3.	Diamond mining in Botswana.	141
11.4.	The Extractive Industries Transparency Initiative.	143
11.5.	Three key elements of good governance	144
12.1.	Geothermal energy potential in Africa.	149
12.2.	Cost-benefit analysis of a micro-hydro system in Nepal	151
12.3.	Sustainable small-scale biofuels promoting rural development in Kenya.	152
12.4.	Wind energy in India	153
12.5.	Promoting solar photovoltaic systems in Africa.	154
12.6.	Improving energy access in rural Argentina with renewable energy	155
12.7.	PSAES: The German-Senegalese Photovoltaic Project	155
12.8.	Solar home system electricity provision: Yeelen Kura, Mali.	156

Tables

9.1.	Analysis of national annual costs of soil degradation in selected countries	119
11.1.	Developing and transition economies with higher dependency on exports of minerals: Mining's contribution to total exports	138

Figures

3.1.	Composition of total wealth in low-income countries	37
3.2.	Uganda: Quantifying the importance of environment and natural resources.	38
3.3.	Household income by source, Masvingo province, Zimbabwe.	39
4.1.	Characteristics of natural resources.	57
4.2.	Relationships between actors: A case study on irrigation.	60
6.1.	Catches in the Mauritania exclusive economic zone (EEZ), 1950-2002	85
6.2.	Net exports of selected agricultural commodities by developing countries	86
6.3.	Export of fisheries products in Africa.	87
6.4.	EU fishing agreements with West and Central African countries	88
7.1.	Contribution of forest to GDP, and ratio of forest exports out of total exports, for selected countries	97
8.1.	Employment in the travel and tourism industry in Africa, 2006	108
8.2.	Economic impacts of gorilla tourism in Uganda.	109
10.1.	Trends in water requirements for food production	127

12.1.	Renewable energy: Electricity generation costs as a percentage of 1980 levels, historical and projected	147
12.2.	Cost competitiveness of selected renewable power technologies	147
12.3.	Annual investment in renewable energy world total, 1995-2007	148
12.4.	Renewable energy growth rates (UNDESA, 2005)	149
12.5.	Technical potential for solar and wind energy in selected regions	149
