Private pension system's key characteristics

Occupational voluntary

Overview

Employers may, on a voluntary basis, conclude pension agreements with their employees. Under the terms of the Royal Decree of 1999, the obligations arising from such agreements may be implemented through group insurance contracts and/or the creation of a pension plan. Pension plans must be financed via pension funds, which have no independent legal status or purpose other than to implement pension plans. Pension agreements can, in exceptional cases, also be implemented through the establishment of book reserves. Arrangements implemented through group insurance contracts and book reserves are not referred to as pension plans and are not subject to pension plan legislation.

Typical plan design

Occupational pension plans are typically defined contribution (DC) in nature. About one-third of plan members belong to occupational pension plans that combine elements of defined benefit (DB) and DC. A small portion of pension plan members belong to occupational pension plans that are DB in nature.

DB pension plans are typically final average pay plans, financed solely by the employer. DC plans are now dominant and employers typically provide between 65% and 80% of total contributions to these plans.

Contributions by employees aged 52 or younger must not exceed EUR 8 000 a year – the ceiling is EUR 7 212 for employees aged 53, and gradually increases to a maximum of EUR 22 838 by age 65. These limits include any contributions made to individual pension plans. Employer contributions must not exceed EUR 8 000 a year for employees aged 52 or younger – the ceiling is EUR 7 212 for employees aged 53, and gradually increases to a maximum of EUR 22 838 by the age of 65.

The retirement age is the same as the age under the social security scheme – 65 for both men and women. Early retirement is possible if a member is eligible for an early retirement pension under the social security scheme. Retirees may choose between three alternative benefit options: annuities, lump sums, or a combination of both. By 2006, 78% of total benefits were paid as lump sums and 22% as pensions.

Coverage

In 2006 around 8% of the active population was covered.

Occupational pension plans cover private-sector employees. Discrimination in coverage is prohibited, but differences in the contribution and benefit structure for different categories of employees are allowed, provided that they are based on objective criteria. Plans may be divided into sub-plans to provide for different categories of employees.

Fees

There are no legal rules concerning administrative costs charged to plan members, but there is a maximum commission based on the size of pension funds' assets. By the end

of 2005, the average commission charged by occupational pension plans was 0.21% of pension assets.

Taxation

Contributions paid by both employers and employees into the pension plans of employees under 52 years old are tax-deductible to a ceiling of EUR 7 212. The ceiling is raised by EUR 1 202 for each year over 52, with a maximum annual contribution of EUR 22 838 by the age of 65. Investment incomes are tax-exempt, while lump-sum benefits are tax-exempt up to 40% of the cash value of accrued benefits or accumulated capital.

Personal voluntary

Overview

Individuals can participate in tax-qualifying pension schemes set up as individual plans. These tax-qualifying schemes are offered by the same financial institutions and under the same rules as occupational pension plans.

Typical plan design

Personal pension plans may only be DB in nature.

Coverage

Individual employees, the self-employed, or the non-employed may participate in individual pension plans established by financial institutions.

Taxation

The same tax regulations governing contributions apply to personal pension plans. The maximum tax-deductible limit applies to the total contribution from both an occupational pension plan and individual pension plan.

Market information

Occupational voluntary

Pension funds must be managed by fund administrators. An *entidad gestora de fondos de pensiones* (pension fund management entity) or authorised life insurance company may administrate a fund. The fund administrator is responsible for managing contributions and benefits. Pension fund management entities must be established as limited companies with the sole business aim of managing pension funds. They must comply with certain minimum capital requirements that depend on the value of pension funds managed and be authorised by, and registered with, the Ministry of Economy.

Occupational pension funds had accumulated assets equivalent to EUR 30 476 millions (USD 38 238 million) in December 2006 (DB: EUR 1 136 millions; DC: EUR 8 722 millions; mixed: EUR 20 619) or 2.5% of GDP. The number of active participants rose to 1.7 million (DB 2%, DC 66%, mixed 32%), whereas the number of pension plans was 1 913 (DB 2%, DC 53%, Mixed 45%).

Personal voluntary

In December 2007 individual pension plans had about 8.6 million participants with accrued assets of EUR 50.3 billion (USD 68.9 billion). The number of pension plans was 1 410.

Reference information

Key legislation

2002: Royal Decree consolidates the Pension Plan and Pension Funds Law of 1987 and regulates the establishment of pension plans, pension funds, and pension fund management entities. It also defines maximum contribution limits, regulates tax treatment, and includes measures to protect rights.

1999: Royal Decree provides the regulatory framework for the implementation of employers' pension agreements with employees and beneficiaries.

Key regulatory and supervisory authorities

General Directorate of Insurance and Pension Funds (Ministry of Economy): oversees pension fund supervision.

Key official statistical references and sources on private pensions

Notes

1. Statistics Canada (2004), *Pension Plans in Canada*, Pensions and Wealth Research Series, 1 January.
2. Statistics Canada.
3. The Reserve Fund is established with 5% of the pension company profits.
4. The TFR is a sort of severance pay scheme that the employer has to pay to an employee in the case of his dismissal or retirement. Every month the employer sets aside 6.91% of the gross salary of the employee; every year the accumulated stock of the TFR, which is accounted as a book reserve in the balance sheet of the employer, is appreciated according to a CPI-linked formula.
5. Minimum pension is equivalent to a 1997's monthly minimum wage updated in accordance with inflation.
6. The average monthly wage in Poland is PLN 2 869.69 (USD 1 025) before tax and social security contributions. The net wage is around 70% of the gross.
7. Contribution rates and information on rates of contracting out were obtained from the Department for Work and Pensions' report entitled *Employers' Pension Provision Survey 2005*.

How to Read the Country Profiles

This section provides country profiles, describing private pension arrangements in individual OECD countries. Each pension country profile is divided into six main sections:

- Demographics and macroeconomics
- Country pension design
- Pension funds data overview
- Private pension system's key characteristics
- Reference information
- Overview of private pension system by type of plan and financing vehicle

The figure below shows how the first three sections are organised on the first page of each country profile.

PRIVATE PENSIONS OUTLOOK 2008 – ISBN 978-92-64-04438-8 – © OECD 2009

Demographics and macroeconomics

1 The first section presents a selection of key demographics and macroeconomics indicators that provide a sense of the size of the country and its economy. GDP figures are from the *OECD Reference*

Series database. Population figures are from the *OECD Population and Labour Force database*.

Country pension design

This section is split into two parts:

2 Potential average pension benefit

This figure displays a broad estimate of the total pension income which an average-earning individual may receive from various sources (state, mandatory, and voluntary occupational pensions) after a full working lifetime. It is expressed as a percentage of the earnings the pensioner had just before retirement. These figures draw and expand on a microeconomic approach used in the publication *Pensions at a Glance*, looking at future individual pension entitlements under 2004 parameters and rules.

The pension incomes projected here, however, should be considered only as broad indications of what may happen, as they are conditional on a number of assumptions. It is assumed that individuals are covered by public pension plans throughout their careers. For the countries where occupational pension plans are common, average-earning individuals are assumed to be covered throughout their careers by occupational pension plans that are typical of market practice in that country. In countries where private pension accounts are compulsory, they are assumed to have participated in the compulsory system throughout their careers. Those with shorter, or periodically interrupted, careers should expect lower benefits than those which are set out in this figure.

A public pension can be an earnings-related pension (a pension computed by reference to a rate of emoluments, whether actual emoluments or not and whether final or average emoluments), a flat rate pension (a pension payable at a rate fixed otherwise than by reference to a rate of emoluments or to the rate of another pension), a minimum pension (the minimum level of pension benefits the plan pays out in all circumstances), a basic state pension (a non-earnings related pension paid by the State to

individuals with a minimum number of service years), or a means-tested pension (pension granted to a person after examination of his/her financial state).

Data cover public pensions and other mandatory or quasi-mandatory private pension plans. Voluntary plans are also included if they cover at least 30% of the working population. Additional pension income may come from other sources, such as individual savings, but these are not included in the data.

For five countries, several projections are presented as private pension systems are in a particular state of change.

3 Structure of private pension systems

The second part displays a bulleted list summarising the structure of private pension systems according to the pension plans currently in place in the country.

Pension funds data overview

4 The third section presents selected pension fund indicators from 2003 to 2007 from the *OECD Global Pension Statistics* project (www.oecd.org/daf/pensions/gps). For further data and analysis, readers can refer to Chapter 2 of this publication.

Private pension system's key characteristics

The information provided in this section covers eight private pension system key characteristics:

- Overview
- Coverage
- Typical plan design
- Contributions
- Benefits
- Fees
- Taxation
- Market information

Depending on data availability, these characteristics are developed for each existing category of pension plan (mandatory vs. voluntary pension plan, occupational vs. personal pension plan). Information provided in this section refers to December 2007 or to the latest available year.

Reference information

This section includes references to key legislation reforms, provides the name of regulatory and supervisory authorities and displays official statistical references and sources on private pensions.

Overview of private pension systems by type of plan and financing vehicle

This last section gives a detailed description of the various private pension plans found in each country as well as the statistical data coverage of the *OECD Global Pension Statistics*.

The following figure gives an example of such an overview. The first two columns provide the name and the description of each pension plan. Pension plans included in the *OECD GPS database* are marked with a tick in the next column, excluding OECD estimates. Under the column headings “Type of plan” and “Financing vehicle” are given the correspondence of each pension plan with the OECD Classification by funding vehicle and by type (see OECD (2005), *Private Pensions: OECD Classification and Glossary*, OECD, Paris).

Glossary

Most of the definitions below draw on the publication *Private Pensions: OECD Classification and Glossary*. It can be downloaded at the following address: www.oecd.org/dataoecd/0/49/38356329.pdf.

Term	Definition
Active member	A pension plan member who is making contributions (and/or on behalf of whom contributions are being made) and is accumulating assets or has accrued assets in the past and is not yet retired.
Annuity	A form of financial contract mostly sold by life insurance companies that guarantees a fixed or variable payment of income benefit (monthly, quarterly, half-yearly, or yearly) for the life of a person (the annuitant) or for a specified period of time. It is different from a life insurance contract which provides income to the beneficiary after the death of the insured. An annuity may be bought through instalments or as a single lump sum. Benefits may start immediately or at a pre-defined time in the future or at a specific age.
Asset allocation	The spread of fund investments among different investment forms.
Asset manager	The individual(s) or entity(ies) endowed with the responsibility to physically invest the pension fund assets. Asset managers may also set out the investment strategy for a pension fund.
Basic state pension	A non-earning related pension paid by the State to individuals with a minimum number of service years.
Beneficiary	An individual who is entitled to a benefit (including the plan member and dependants).
Benefit	Payment made to a pension fund member (or dependants) after retirement.
Book reserved pension plans	Sums entered in the balance sheet of the plan sponsor as reserves or provisions for occupational pension plan benefits. Some assets may be held in separate accounts for the purpose of financing benefits, but are not legally or contractually pension plan assets. Most OECD countries do not allow this method of financing. Those that do usually require these plans to be insured against bankruptcy of the plan sponsor through insolvency guaranty arrangement.
Closed pension funds	Funds that support only pension plans that are limited to certain employees (<i>e.g.</i> those of an employer or group of employers).
Contribution	A payment made to a pension plan by a plan sponsor or a plan member.
Contribution rate	The amount (typically expressed as a percentage of the contribution base) that is needed to be paid into the pension fund.
Deferred member	A pension plan member that no longer contributes to or accrues benefits from the plan but has not yet begun to receive retirement benefits from that plan.
Deferred pension	A pension arrangement in which a portion of an employee's income is paid out at a date after which that income is actually earned.
Deferred retirement	A situation when an individual decides to retire later and draw the pension benefits later than their normal retirement age.
Defined benefit (DB) occupational pension plans	Occupational plans other than defined contribution plans. DB plans generally can be classified into one of three main types, "traditional", "mixed" and "hybrid" plans.
"Traditional" DB plan	A DB plan where benefits are linked through a formula to the members' wages or salaries, length of employment, or other factors.

Term	Definition
"Hybrid" DB plan	A DB plan where benefits depend on a rate of return credited to contributions, where this rate of return is either specified in the plan rules, independently of the actual return on any supporting assets (<i>e.g.</i> fixed, indexed to a market benchmark, tied to salary or profit growth, etc.), or is calculated with reference to the actual return of any supporting assets and a minimum return guarantee specified in the plan rules.
"Mixed" DB plan	A DB plan that have two separate DB and DC components but which are treated as part of the same plan.
Defined contribution (DC) occupational pension plans	Occupational pension plans under which the plan sponsor pays fixed contributions and has no legal or constructive obligation to pay further contributions to an ongoing plan in the event of unfavourable plan experience.
Dependant	An individual who is financially dependent on a (passive or active) member of a pension scheme.
Dependency ratio	Typically defined as the ratio of non-active age to those of active age in a given population.
Final average earnings	The fund member's earnings that are used to calculate the pension benefit in a defined benefit plan; it is typically the earnings of the last few years prior to retirement.
Fund member	An individual who is either an active (working or contributing, and hence actively accumulating assets) or passive (retired, and hence receiving benefits), or deferred (holding deferred benefits) participant in a pension plan.
Funded pension plans	Occupational or personal pension plans that accumulate dedicated assets to cover the plan's liabilities.
Funding	The act of accumulating assets in order to finance the pension plan.
Funding level	The relative value of a scheme's assets and liabilities, usually expressed as a percentage figure.
Funding rules	Regulation that requires the maintenance of a certain level of assets in a pension fund in relation to pension plan liabilities.
Gross rate of return	The rate of return of an asset or portfolio over a specified time period, prior to discounting any fees of commissions.
Group pension funds	Multi-employer pension funds that pool the assets of pension plans established for related employers.
Industry pension funds	Funds that pool the assets of pension plans established for unrelated employers who are involved in the same trade or business.
Mandatory contribution	The level of contribution the member (or an entity on behalf of the member) is required to pay according to scheme rules.
Mandatory occupational plans	Participation in these plans is mandatory for employers. Employers are obliged by law to participate in a pension plan. Employers must set up (and make contributions to) occupational pension plans which employees will normally be required to join. Where employers are obliged to offer an occupational pension plan, but the employees' membership is on a voluntary basis, these plans are also considered mandatory.
Mandatory personal plans	These are personal plans that individuals must join or which are eligible to receive mandatory pension contributions. Individuals may be required to make pension contributions to a pension plan of their choice normally within a certain range of choices or to a specific pension plan.
Minimum pension	The minimum level of pension benefits the plan pays out in all circumstances.
Multi-employer pension funds	Funds that pool the assets of pension plans established by various plan sponsors. There are three types of multi-employer pension funds: <i>a)</i> for related employers <i>i.e.</i> companies that are financially connected or owned by a single holding group (group pension funds); <i>b)</i> for unrelated employers who are involved in the same trade or business (industry pension funds); <i>c)</i> for unrelated employers that may be in different trades or businesses (collective pension funds).
Net rate of return	The rate of return of an asset or portfolio over a specified time period, after discounting any fees of commissions.
Normal pension age	Age from which the individual is eligible for pension benefits.
Occupational pension plans	Access to such plans is linked to an employment or professional relationship between the plan member and the entity that establishes the plan (the plan sponsor). Occupational plans may be established by employers or groups thereof (<i>e.g.</i> industry associations) and labour or professional associations, jointly or separately. The plan may be administered directly by the plan sponsor or by an independent entity (a pension fund or a financial institution acting as pension provider). In the latter case, the plan sponsor may still have oversight responsibilities over the operation of the plan.
Open pension funds	Funds that support at least one plan with no restriction on membership.

Term	Definition
Overfunding	The situation when the value of a plan's assets are more than its liabilities, thereby having an actuarial surplus.
Pension assets	All forms of investment with a value associated to a pension plan.
Pension funds	The pool of assets forming an independent legal entity that are bought with the contributions to a pension plan for the exclusive purpose of financing pension plan benefits. The plan/fund members have a legal or beneficial right or some other contractual claim against the assets of the pension fund. Pension funds take the form of either a special purpose entity with legal personality (such as a trust, foundation, or corporate entity) or a legally separated fund without legal personality managed by a dedicated provider (pension fund management company) or other financial institution on behalf of the plan/fund members.
Pension insurance contracts	Insurance contracts that specify pension plans contributions to an insurance undertaking in exchange for which the pension plan benefits will be paid when the members reach a specified retirement age or on earlier exit of members from the plan. Most countries limit the integration of pension plans only into pension funds, as the financial vehicle of the pension plan. Other countries also consider the pension insurance contract as the financial vehicle for pension plans.
Pension plan	A legally binding contract having an explicit retirement objective (or in order to satisfy tax related conditions or contract provisions the benefits cannot be paid at all or without a significant penalty unless the beneficiary is older than a legally defined retirement age). This contract may be part of a broader employment contract, it may be set forth in the plan rules or documents, or it may be required by law. In addition to having an explicit retirement objective, pension plans may offer additional benefits, such as disability, sickness, and survivors' benefits.
Pension plan sponsor	An institution (<i>e.g.</i> company, industry/ employment association) that designs, negotiates, and normally helps to administer an occupational pension plan for its employees or members.
Personal pension plans	Access to these plans does not have to be linked to an employment relationship. The plans are established and administered directly by a pension fund or a financial institution acting as pension provider without any intervention of employers. Individuals independently purchase and select material aspects of the arrangements. The employer may nonetheless make contributions to personal pension plans. Some personal plans may have restricted membership.
Private pension funds	A pension fund that is regulated under private sector law.
Private pension plans	A pension plan administered by an institution other than general government. Private pension plans may be administered directly by a private sector employer acting as the plan sponsor, a private pension fund or a private sector provider. Private pension plans may complement or substitute for public pension plans. In some countries, these may include plans for public sector workers.
Projected Benefit Obligation (PBO)	The actuarial present value of vested and non-vested benefits attributed to the plan through the pension benefit formula for service rendered to that date based on employees' future salary levels.
Protected pension plan	A plan (personal pension plan or occupational defined contribution pension plan) other than an unprotected pension plan. The guarantees or promises may be offered by the pension plan/fund itself or the plan provider (<i>e.g.</i> deferred annuity, guaranteed rate of return).
Public pension funds	Pension funds that are regulated under public sector law.
Public pension plans	Social security and similar statutory programmes administered by the general government (that is central, state, and local governments, as well as other public sector bodies such as social security institutions). Public pension plans have been traditionally PAYG financed, but some OECD countries have partial funding of public pension liabilities or have replaced these plans by private pension plans.
Rate of return	The income earned by holding an asset over a specified period.
Replacement rate	The ratio of an individual's (or a given population's) (average) pension in a given time period and the (average) income in a given time period.
Separate accounts	A pension fund that is legally segregated from both the plan sponsor and a financial institution that acts as the manager of the fund on behalf of the plan member.
Single employer pension funds	Funds that pool the assets of pension plans established by a single sponsor.
Trust	A legal scheme, whereby named people (termed trustees) hold property on behalf of other people (termed beneficiaries).
Trustee	A person or a company appointed to carry out the tasks of the trust.
Underfunding	The situation when the value of a plan's assets are less than its liabilities, thereby having an actuarial deficiency.

Term	Definition
Unfunded pension plans	Plans that are financed directly from contributions from the plan sponsor or provider and/ or the plan participant. Unfunded pension plans are said to be paid on a current disbursement method (also known as the pay as you go, PAYG, method). Unfunded plans may still have associated reserves to cover immediate expenses or smooth contributions within given time periods. Most OECD countries do not allow unfunded private pension plans.
Unprotected pension plan	A plan (personal pension plan or occupational defined contribution pension plan) where the pension plan/fund itself or the pension provider does not offer any investment return or benefit guarantees or promises covering the whole plan fund.
Voluntary contribution	An extra contribution paid in addition to the mandatory contribution a member can pay to the pension fund in order to increase the future pension benefits.
Voluntary occupational pension plans	The establishment of these plans is voluntary for employers (including those in which there is automatic enrolment as part of an employment contract or where the law requires employees to join plans set up on a voluntary basis by their employers). In some countries, employers can, on a voluntary basis, establish occupational plans that provide benefits that replace at least partly those of the social security system. These plans are classified as voluntary, even though employers must continue sponsoring these plans in order to be exempted (at least partly) from social security contributions.
Voluntary personal pension plans	Participation in these plans is voluntary for individuals. By law individuals are not obliged to participate in a pension plan. They are not required to make pension contributions to a pension plan. Voluntary personal plans include those plans that individuals must join if they choose to replace part of their social security benefits with those from personal pension plans.

2.5.	Total investment of pension funds in OECD and selected non-OECD countries, 2001-2007	85
2.6.	Total investment of pension funds in OECD and selected non-OECD countries, 2001-2007	87
2.7.	Total number of pension funds in selected OECD countries, 2001-2007	89
2.8.	Pension fund portfolio allocation in selected OECD countries, 2007	90
2.9.	Pension fund portfolio allocation in selected OECD countries, 2006	91
2.10.	Pension fund portfolio allocation in selected OECD countries, 2005	92
2.11.	Pension funds' net income in selected OECD countries, 2001-2007	93
2.12.	Pension funds' benefits in selected OECD countries, 2001-2007	94
2.13.	Pension funds' contributions in selected OECD countries, 2001-2007	95
2.14.	Employers' contributions vs. employees' contributions in selected OECD countries, 2001-2007	96
2.15.	List of administrative sources, OECD countries	97
2.16.	List of administrative sources, non-OECD countries	98
2.17.	Annual gross domestic product, expenditure approach, current prices	99
2.18.	Currency exchange rate	100
3.1.	Size of public pension reserve fund markets in selected OECD and non-OECD countries, 2007	103
3.2.	Asset allocation information of public pension reserve funds, 2007	106
3.3.	Changes in public pension reserve fund allocations to equities and bonds in selected OECD and non-OECD countries, 2001 vs. 2007	107
4.1.	Gross replacement rate and coverage in public and private pension systems in selected OECD and non-OECD countries	111
4.2.	Assumptions used for retirement income projections under the Base-Case Scenario	120
4.3.	Basic statistical information on real investment returns by country	128
4.4.	Countries pension funds' returns net of benchmark returns	131
4.5.	Private pensions' fee structure in selected OECD and non-OECD countries, 2007	143
4.6.	Limit on fees in selected OECD and non-OECD countries, 2007	146
4.7.	Average administration fee in selected OECD and non-OECD countries, 2007	147

List of figures

S.1.	Major stock market performance	15
S.2.	Nominal and real pension fund returns in selected OECD countries January-October 2008	16
S.3.	Nominal average annual pension fund return in selected OECD countries over the last 5, 10 and 15 years	17
R.1.	Private pension plan: Functional perspective	32
R.2.	Private pension plan: Institutional perspective	32
1.1.	Public and private pension expenditure in selected OECD countries, 2006	42
1.2.	Total private pension assets, 2007	44
1.3.	Private pension assets compared with the public pension system's gross replacement rate, 2007	45

1.4.	Private pension assets in 2007 compared to the difference in average growth rates of private pension assets and GDP over the period 2001-07 in selected OECD countries	46
1.5.	Ratio of the inactive elderly population aged 65 and over to the labour force. . . .	47
1.6.	Ratio of public pension reserve funds' assets and public pension expenditure for selected OECD countries, 2006	48
1.7.	Total assets under management within selected financial entities, 2007	49
1.8.	Relative share and total assets by type of institutional investors, 1995-2007 . .	49
1.9.	Private pension assets by type of financing vehicle, 2007	51
1.10.	Private pension assets by pension plan type in selected OECD countries, 2007 . . .	53
1.11.	Defined benefit private pension assets for selected OECD countries, 2003-2007	54
2.1.	Geographical distribution of pension fund assets in OECD countries, 2001-2007	58
2.2.	Trends in total OECD pension funds assets, 2001-2007.	59
2.3.	Pension funds' average annual growth rate in total assets over 2001-2007 in OECD countries	59
2.4.	Pension funds' average annual growth rate in total active members over 2001-2007 in selected OECD countries	60
2.5.	Importance of pension funds relative to the size of the economy in OECD countries, 2007.	61
2.6a.	Trends in pension fund assets: OECD countries with mature markets, 2001-2007	62
2.6b.	Trends in pension fund assets: OECD countries with growing markets, 2001-2007	63
2.6c.	Trends in pension fund assets: OECD countries with sluggish markets, 2001-2007	63
2.7.	Pension fund assets as a percentage of stock market capitalisation in OECD countries, 2007	64
2.8.	Defined benefit vs. defined contribution assets in total selected OECD countries, 2003-2007	65
2.9.	Relative shares of defined benefit and defined contribution pension fund assets in selected OECD countries, 2007	66
2.10.	Average size of pension fund (ratio of pension funds' total assets to the number of funds) in selected OECD countries, 2007	67
2.11.	Average size of pension fund member account (ratio of pension funds' total assets to the number of active members) in selected OECD countries, 2007 . . .	68
2.12.	Pension fund asset allocation for selected investment categories in selected OECD countries, 2007	69
2.13.	Variations in bills and bonds allocations between 2001 and 2007 in selected OECD countries	70
2.14.	Variations in equities allocations between 2001 and 2007 in selected OECD countries.	70
2.15.	Assets issued by entities located abroad in selected OECD countries, 2001-2007	73
2.16.	Investment in mutual funds in selected OECD countries, 2007	74

2.17.	Structure of defined benefit and defined contribution asset allocation in pension funds in selected OECD countries, 2007.....	74
2.18.	Portfolio limits on OECD pension funds' investment in equities, 2007.....	75
2.19.	Portfolio limits on OECD pension funds' investment in corporate bonds, 2007.....	76
2.20.	Portfolio limits on OECD pension funds' foreign investment, 2007.....	77
2.21.	Pension funds' net income for selected OECD countries, 2007.....	78
2.22.	Pension funds' benefits for selected OECD countries, 2001-2007.....	79
2.23.	Pension funds' contributions for selected OECD countries, 2001-2007.....	79
2.24.	Employers' contributions vs. employees' contributions in selected OECD countries, 2007.....	80
2.25.	Importance of pension funds relative to the size of the economy in selected non-OECD countries, 2007.....	81
2.26.	Asset allocation to major investment categories in selected non-OECD countries, 2007.....	82
3.1.	2007 Public pension reserve funds' assets and 2001-07 average annual growth rate.....	102
3.2.	Asset allocation of public pension reserve funds in selected OECD and non-OECD countries, 2007.....	105
3.3.	Foreign investment in public pension reserve funds in selected OECD and non-OECD countries, 2007.....	108
4.1.	Coverage of voluntary private pension plans by age.....	114
4.2.	Coverage of voluntary private pension plans by income.....	115
4.3.	Potential replacement ratio at normal retirement age: public pension, mandatory private pensions and typical occupational plans.....	121
4.4.	Potential replacement ratios at normal retirement age: base case, higher and lower investment returns scenarios.....	123
4.5.	Potential replacement ratios at normal retirement age: base case, higher and lower salary scale scenarios.....	124
4.6.	Potential replacement ratios at normal retirement age: base case, higher and lower cost of annuitisation scenarios.....	126
4.7.	Average annual returns and their standard deviation, 2000-2005.....	128
4.8.	Number of companies in the sample examined.....	134
4.9.	Companies reporting defined benefit obligations, 2007.....	135
4.10.	Weight of defined benefit obligation as compared to market capitalisation... ..	136
4.11.	Weight of pension obligation (DBO) compared with market capitalisation in selected OECD and non-OECD countries, 2007.....	137
4.12.	Average percentage over/(under) funding of sampled companies in selected OECD and non-OECD countries, 2007.....	138
4.13.	Total operating costs of pension funds, 2007.....	140
4.14.	Administrative charges per member in selected OECD and non-OECD countries, 2007.....	148
4.15.	Administrative charges in selected OECD and non-OECD countries, 2007....	148
4.16.	Evolution of total fees since the inception of each system.....	149
