ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

The OECD is a unique forum where the governments of 30 democracies work together to address the economic, social and environmental challenges of globalisation. The OECD is also at the forefront of efforts to understand and to help governments respond to new developments and concerns, such as corporate governance, the information economy and the challenges of an ageing population. The Organisation provides a setting where governments can compare policy experiences, seek answers to common problems, identify good practice and work to co-ordinate domestic and international policies.

The OECD member countries are: Australia, Austria, Belgium, Canada, the Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Korea, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, the Slovak Republic, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States. The Commission of the European Communities takes part in the work of the OECD.

OECD Publishing disseminates widely the results of the Organisation's statistics gathering and research on economic, social and environmental issues, as well as the conventions, guidelines and standards agreed by its members.

Chapter 3. Supporting regulatory reform	63
Low growth and the structure of the economy	64
Progress in regulatory reform, 1998-2008	78
Quantifying the effects of liberalisation	80
The OECD Review of Regulatory Reform	82
Notes	88
Bibliography	89
Chapter 4. Towards better schools and more equal opportunities for learning	93
The main challenges facing Italian education	94
Containing spending in primary and secondary education	106
The main drivers of educational outcomes	111
Introducing schools' incentives to performance	116
Improving teaching quality	120

Improving transition from upper-secondary school to the labour market and tertiary education.....	129
Conclusions.....	130
Notes.....	132
Bibliography.....	133
Annex 4.A1. The determinants of PISA scores: the cross-country perspective and a study of drivers of disparities across Italian regions.....	137

Boxes

1.1. Spending measures in the anti-crisis packages.....	30
1.2. Summary of recommendations on fiscal policy.....	32
2.1. Measures to support the financial system.....	57
2.2. Summary of recommendations on the financial system.....	58
3.1. The model used for the simulations.....	81
3.2. Key recommendations on growth-promoting regulatory reform.....	88
4.1. Institutional responsibilities in the Italian education system: current setting and changes under fiscal federalism.....	102
4.2. The 2007 White Paper on Italian schools.....	104
4.3. Planned legislation on schools.....	106
4.4. An empirical analysis of determinants of educational outcomes in Italy.....	111
4.5. Relation between feedback arrangements and schooling outcomes, some results from the literature.....	117
4.6. Results and lessons from the first national external standard-based exam at the end of lower-secondary education.....	119
4.7. Can education reform further the interests of teachers?.....	128
4.8. Summary of the recommendations on Education.....	130

Tables

1.1. Demand, output and prices.....	26
2.1. Asset shares in the Italian financial system.....	39
2.2. Assets and liabilities of the household sector.....	41
2.3. Net interest, per cent of total income; loans to customers, per cent of assets.....	45
2.4. Funding structure of the banking system, selected countries.....	46
2.5. Italian banks assets in Central and Eastern Europe.....	54
3.1. Productivity growth by sector, period annual averages.....	69
3.2. The potential effects of improving regulation in the future.....	82
3.3. Indicators of legal system efficiency.....	84
4.1. Education expenditure in Italy.....	107
4.2. Determinants of teacher per student ratio Italy.....	108
4.3. Italy has few school or pupil evaluation tools.....	118
4.4. Teachers in Italy are not subject to any kind of evaluation.....	124
4.A1.1. Descriptive statistics of the variables used in the empirical model.....	139
4.A1.2. The determinants of educational achievements, cross-country and within country analysis.....	140
4.A1.3. Robustness analysis of within country regression.....	143

Figures

1.1. Decomposition of potential growth: an international comparison	21
1.2. Italian competitiveness	22
1.3. Industrial Production has fallen steeply	22
1.4. House prices, selected countries	23
1.5. Italian recessions since 1974	25
1.6. Public debt and interest rates	27
2.1. Stock and bond market capitalisation as a per cent of GDP, 2007	38
2.2. Financial debt of non-financial corporations, % of GDP	40
2.3. Bank credit default swap rates	43
2.4. Indices of regulatory oversight and restrictions	47
2.5. Growth rate of loans to non-financial corporations	51
2.6. Credit conditions according to the Bank Lending Survey	51
2.7. Average interest rates for mortgages, consumer credit and business loans ...	52
2.8. Maturity structure, bank bonds	55
3.1. Measures of per capita GDP	65
3.2. Employment rate by age, 2007	66
3.3. Regular and temporary employment protection legislation (EPL), 2006	67
3.4. Exports in the economy	69
3.5. The stock of foreign direct investment, 2006	70
3.6. Venture Capital as a % of GDP in OECD countries, 2007	72
3.7. Business demographics, average 1998-2005	73
3.8. Indicators of R&D effort in OECD countries	75
3.9. Aggregate regulation (integrated PMR) and its dispersion across countries over time	78
4.1. Italy has below-average PISA scores	96
4.2. Strong disparities in educational outcomes across regions	97
4.3. Social segregation between schools may hinder social mobility later in life	98
4.4. High expenditure per student and low educational outcomes	100
4.5. Efficiency in provision of education services across regions, 2003	101
4.6. Low completion rates in higher education and a difficult transition to the labour market	105
4.7. Small schools and small class size in Italy	109
4.8. What matters for educational outcomes?	112
4.9. Explaining educational outcomes: the North and South are not so different	113
4.10. Italian schools have relatively little autonomy and accountability	115
4.11. Italian teachers' wages are lower than the OECD average, but the gap has been closing	122

This Survey is published on the responsibility of the Economic and Development Review Committee of the OECD, which is charged with the examination of the economic situation of member countries.

The economic situation and policies of Italy were reviewed by the Committee on 22 April 2009. The draft report was then revised in the light of the discussions and given final approval as the agreed report of the whole Committee on 5 May 2009.

The Secretariat's draft report was prepared for the Committee by Paul O'Brien, Romina Boarini and Enrico Sette with statistical assistance from Annette Panzera, Margherita Comola, Serena Fumagalli and Jens Arnold under the supervision of Patrick Lenain.

The previous Survey of Italy was issued in June 2007.

BASIC STATISTICS OF ITALY

THE LAND

Area (thousand sq. km)	301.3	Population of major cities (thousands, 20.10.2001):	
Agricultural area (thousand sq. km, 1995)	165.2	Rome	2 547
		Milan	1 256
		Naples	1 005
		Turin	865

THE PEOPLE

Population, 2007 (in thousands)	59 336	Labour force, 2008, thousands	24 854
Number of inhabitants per sq. km	197	Employment, 2007, thousands	24 492
Population growth rate (annual growth rate, %) in 2007	0.69	In agriculture	895
Fertility rate in 2006	1.35	In industry	6 954
Life expectancy in 2006	69.8	In services	15 809

THE PRODUCTION

Gross domestic product in 2008, billions €	1 572.2	Origin of gross domestic product in 2008	
GDP per head (2008, USD)	30 315.6	at market prices, % of total:	
Gross fixed capital formation (% of GDP in 2008)	17.0	Agriculture	1.6
		Industry	31.8
		Construction	6.7
		Other	60

THE PUBLIC SECTOR

Current expenditure in 2008 (% of GDP)	48.7	Gross financial liabilities in 2007 (% of GDP)	112
Current revenue in 2008 (% of GDP)	45.8	General government investment in 2003	
		(% of total investment)	10.7

THE FOREIGN TRADE

Export of goods and services in 2006 (% of GDP)	27.9	Imports of goods and services in 2006 (% of GDP)	28.7
Main export categories in 2006, as a % of total exports:		Main import categories in 2006, as a % of total imports:	
Manufactured goods	34.6	Foodstuffs	6.3
Fabric and textile goods	12.5	Manufactured goods	22.5
Chemical products	9.7	Metal, ores and scraps	15.0
Transport equipment	4.7	Chemical products	12.7
Mineral fuels	0.3		

THE CURENCY

Monetary unit: Euro (€)		Currency units per USD (\$), average of daily figures	
		2008	0.68
		2009 (March)	0.77

Executive summary

Italy is facing a difficult period. The economy is in a sharp recession, mainly because of external developments linked to the global financial crisis, and there is great uncertainty about the strength and timing of the recovery. Despite a relatively healthy banking system Italy seems particularly sensitive to both the credit tightening which has occurred in line with that in other countries and the weakness in external demand. This sensitivity has probably been accentuated both by the poor productivity and aggregate profitability performance of the economy over the past decade or more, and by the weak underlying fiscal situation. An array of budget neutral measures have been taken in the short term, but economic performance can be enhanced over the longer term by both macroeconomic and structural policy reforms.

Fiscal policy needs to focus on two areas: improving the efficiency with which current spending achieves its aims, and ensuring that long run trends in spending commitments are contained. For the time being, there is no space to increase the public sector deficit beyond what is implied by the operation of automatic stabilisers. But measures such as recent efforts to redirect spending towards the unemployed and poorer families can both help to increase somewhat the effect of automatic stabilisers and do something to relieve the impact of the recession on those likely to be hardest hit. In the longer term, fiscal trends are less problematic than in many other countries thanks to several pension reforms introduced in the past; nonetheless, the fact that full implementation of the pension reform will need considerable determination and Italy's high-debt starting point mean that continuing efforts are needed.

In the financial sector, Italy's relatively conservative banks and cautious regulation seem to have helped avoid serious domestic problems for the banking sector in the crisis so far. But credit has tightened nevertheless and risks remain, as in all countries. Efforts to find ways to recapitalise the banks should continue, preferably through private finance, domestic or foreign, but not excluding provision of public capital, although there is understandable reluctance to envisage even partial public ownership.

Structural policies should not be forgotten, even in a crisis period. Italy can build on previous progress in areas such as liberalisation in services. This liberalisation should be completed and extended to other areas, for example in transport and other local services, to increase the extent to which competition is used to improve services to customers and to raise overall efficiency. Different parts of the public administration provide key services to the economy, whether in drafting and implementing regulations, collecting taxes or enforcing contracts in the courts. Plans to improve efficiency in public administration should be pursued and the use of various audit mechanisms, such as regulatory impact analysis and public spending reviews, should be an integral part of this.

The education system in Italy is facing major change as the government has announced its intention to rationalise expenditure in the sector and to reinforce the evaluation system; it also intends to introduce new recruiting, initial training and incentive schemes for teachers, but definitive measures in this area have yet to be adopted. Lack of clear information for evaluating pupil and school performance is indeed a weakness of the current system, as is the fact that few actors in the

system, from teachers to the central administration, are held to account for poor performance. Accountability needs to be introduced at several levels, notably for school principals and budget managers, but also for teachers, so that those responsible for key decisions such as teacher recruitment, class formation and teaching methods have both appropriate information on which to judge outcomes and incentives to improve. But if principals are to be held to account, they must have appropriate autonomy and powers of management, contrasting with the current almost complete lack of autonomy at the school level. Given the interrelated nature of these reforms, it would be best to introduce them as a self-contained package, rather than in a piecemeal fashion.
