.. Not available

Note: 1986-88, 1995-97 and 2012-14: unweighted averages. p: provisional.

A revised GSSE definition with new categories was introduced in 2014. When possible, the revision was implemented for the whole time series. The GSSE series and the resulting TSE are not comparable with the series published previously. (For more details see the Annex 1.A1 to Chapter 1).

1. Data are presented from 1995 onwards.

2. EU12 for 1986-88; EU15 for 1995-97; EU27 for 2012-13; and EU28 from 2014 when available.

3. The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.

4. For Mexico, the period 1986-88 is replaced by 1991-93.

5. OECD EU countries are included individually in the OECD total for all years prior to their accession to the EU. Slovenia is only included from 1992. The OECD total does not include the non-OECD EU member states.
