Principaux groupes de pays de l'OCDE

Les données dans la première partie du PIE figurent individuellement pour les pays membres, la zone euro, l'Union européenne ainsi que pour deux principaux groupes de pays : OCDE-Total et les Sept grands pays. La composition de ces groupes de pays est fournie ci-dessous :

OCDE-total : les 34 pays membre de l'OCDE.

Sept grands pays : l'Allemagne, le Canada, les États-Unis, la France, l'Italie, le Japon et le Royaume-Uni.

Zone euro : Les 19 pays de la zone euro.

UE27 : Les 27 pays de l'Union européenne.

UE28 : Les 27 pays de l'Union européenne et Croatie.

Calcul des totaux par groupe

Les totaux pour la zone euro et l'Union européenne proviennent des autorités européennes responsables des statistiques en question. Différentes méthodes sont utilisées pour calculer les totaux pour l'OCDE inclus dans cette publication.

Les méthodes utilisées sont les suivantes :

Les totaux sont calculés seulement lorsqu'au moins 75 % des données sont disponibles ; des périodes récentes sont employées comme repère. Si les données sont additives (par exemple l'emploi en personnes), alors le total est calculé en additionnant les composantes. Dans ce cas, des estimations sont effectuées pour les pays qui présentent des données manquantes.

Pour les autres séries, les données sont converties en monnaie commune, en utilisant comme facteur de conversion soit des dollars des États-Unis, soit des Parités de pouvoir d'achat (PPA). Pour les indices, les poids sont calculés en utilisant le Produit intérieur brut nominal ou la Dépense de consommation finale privée en PPA.

Lorsque les indices chaînés sont utilisés, la méthode utilise normalement un indice chaîné annuel de Laspeyres. Dans la plupart des cas, les pays qui présentent des données manquantes ne font pas l'objet d'estimations séparées car la procédure qui crée les indices chaînés prend en compte implicitement ces estimations.

ORGANISATION DE COOPÉRATION ET DE DÉVELOPPEMENT ÉCONOMIQUES

L'OCDE est un forum unique en son genre où les gouvernements œuvrent ensemble pour relever les défis économiques, sociaux et environnementaux que pose la mondialisation. L'OCDE est aussi à l'avant-garde des efforts entrepris pour comprendre les évolutions du monde actuel et les préoccupations qu'elles font naître. Elle aide les gouvernements à faire face à des situations nouvelles en examinant des thèmes tels que le gouvernement d'entreprise, l'économie de l'information et les défis posés par le vieillissement de la population. L'Organisation offre aux gouvernements un cadre leur permettant de comparer leurs expériences en matière de politiques, de chercher des réponses à des problèmes communs, d'identifier les bonnes pratiques et de travailler à la coordination des politiques nationales et internationales.

Les pays membres de l'OCDE sont : l'Allemagne, l'Australie, l'Autriche, la Belgique, le Canada, le Chili, la Corée, le Danemark, l'Espagne, l'Estonie, les États-Unis, la Finlande, la France, la Grèce, la Hongrie, l'Irlande, l'Islande, Israël, l'Italie, le Japon, le Luxembourg, le Mexique, la Norvège, la Nouvelle-Zélande, les Pays-Bas, la Pologne, le Portugal, la République slovaque, la République tchèque, le Royaume-Uni, la Slovénie, la Suède, la Suisse et la Turquie. La Commission européenne participe aux travaux de l'OCDE.

Les Éditions OCDE assurent une large diffusion aux travaux de l'Organisation. Ces derniers comprennent les résultats de l'activité de collecte de statistiques, les travaux de recherche menés sur des questions économiques, sociales et environnementales, ainsi que les conventions, les principes directeurs et les modèles développés par les pays membres.

Principaux indicateurs économiques

Les *Principaux indicateurs économiques (PIE)* mensuels présentent des statistiques comparatives qui permettent d'avoir une vue d'ensemble des développements économiques les plus récents survenus dans les 34 pays de l'OCDE*, dans la zone euro et dans certaines économies non membres**.

Ces statistiques clés à court terme constituent un outil d'analyse unique et indispensable pour les planificateurs du secteur privé, les économistes, les universitaires, les chercheurs et les étudiants. Ces indicateurs bénéficient de la présentation tabulaire la plus récente et la plus conviviale. Ils couvrent les comptes nationaux, les enquêtes de conjoncture, les opinions des ménages, les indicateurs avancés, le commerce de détail, la production, la construction, les prix, l'emploi, le chômage, les salaires, les finances, le commerce international et la balance des paiements.
