

STATISTISCHER ANHANG

Dieser Anhang enthält Angaben zu den wichtigsten ökonomischen Datenreihen, die als Hintergrundmaterial für die im Hauptteil des Berichts beschriebenen jüngsten wirtschaftlichen Entwicklungen im OECD-Raum dienen. Bei den Daten für den Zeitraum 2014-2016 handelt es sich um Schätzungen und Projektionen der OECD. In einigen Tabellen wurden die Daten angepasst, um international vereinbarten Konzepten und Definitionen zu entsprechen sowie eine bessere Vergleichbarkeit zwischen den Ländern und zugleich die Konsistenz mit früheren Daten in anderen OECD-Publikationen zu gewährleisten. Die regionalen Aggregate basieren auf Gewichtungskoeffizienten, die für jeden Beobachtungszeitraum neu definiert werden, wobei die Koeffizienten von den jeweiligen Datenreihen abhängen. Wegen Einzelheiten bezüglich der Aggregation, vgl. *OECD Economic Outlook Sources and Methods*.

Die Methoden und die statistischen Konzepte und Quellen, die den OECD-Projektionen zu Grunde liegen, werden in *OECD Economic Outlook, Sources and Methods* (www.oecd.org/eco/sources-and-methods.htm) detailliert beschrieben.

Korrigenda für die aktuelle sowie gegebenenfalls frühere Ausgaben finden sich unter www.oecd.org/publishing/corrigenda.htm.

Die statistischen Daten für Israel wurden von den zuständigen israelischen Stellen bereitgestellt, die für sie verantwortlich zeichnen. Die Verwendung dieser Daten durch die OECD erfolgt unbeschadet des völkerrechtlichen Status der Golanhöhen, von Ost-Jerusalem und der israelischen Siedlungen im Westjordanland.

ANMERKUNG ZU DEN QUARTALSPROJEKTIONEN

Die vierteljährlichen Projektionen der OECD für ausgewählte Schlüsselvariable werden auf saison- und arbeitstagsbereinigter Basis erstellt. Das bedeutet, dass zwischen den bereinigten und unbereinigten Jahresdaten u.U. Differenzen entstehen können, wenn diese auch im Allgemeinen verhältnismäßig klein sind. In einigen Ländern enthalten die amtlich projizierten Jahresdaten keine arbeitstäglichen Bereinigungen. Selbst wenn die amtlichen Prognosen auf der Basis der Arbeitstage erstellt wurden, kann der Umfang der entsprechenden Anpassung in einigen Fällen von dem der OECD-Praktiken abweichen.

Zusätzliche Informationen

Gewichtungskoeffizienten von 2013 für die regionalen realen BIP-Aggregate

	OECD- Euroraum ¹	OECD	Welt- weit		OECD- Euroraum ¹	OECD	Welt- weit

Schweiz		1.0	0.5	Nicht-OECD-Länder		100.0	47.6
Slowakische Republik	1.1	0.3	0.2	Weltweit			100.0

Anmerkung: Die Gewichtungskoeffizienten werden anhand des nominalen BIP zu KKP-Kursen von 2013 berechnet. Die regionalen Aggregate werden anhand der zu KKP-Kursen evaluierten gleitenden nominalen BIP-Gewichtungen berechnet. Daher weichen die Ländergewichtungen von Jahr zu Jahr ab. Außerdem können die Gewichtungskoeffizienten für verschiedene BIP-Komponenten unterschiedlich ausfallen, da die Gewichtungen auf den Länderanteilen am Gesamtwert der spezifischen Komponente basieren.

1. Länder, die sowohl Mitglied des Euroraums als auch der OECD sind.

Anhangstabellen

(englische Fassung)

Demand and Output

1.	Real GDP	241
2.	Nominal GDP	242
3.	Real private consumption expenditure	243
4.	Real public consumption expenditure	244
5.	Real total gross fixed capital formation	245
6.	Real gross private non-residential fixed capital formation	246
7.	Real gross residential fixed capital formation	247
8.	Real total domestic demand	248
9.	Foreign balance contributions to changes in real GDP	249
10.	Output gaps	250

Wages, Costs, Unemployment and Inflation

11.	Compensation per employee in the total economy	251
12.	Labour productivity in the total economy	252
13.	Unemployment rates: commonly used definitions	253
14.	Harmonised unemployment rates	254
15.	Labour force, employment and unemployment	255
16.	GDP deflators	256
17.	Private consumption deflators	257
18.	Consumer price indices	258
19.	Oil and other primary commodity markets	259

Key Supply-Side data

20.	Employment and labour force	260
21.	Potential GDP and productive capital stock	261
22.	Structural unemployment and unit labour costs	262

Saving

23.	Household saving rates	263
24.	Gross national saving	264

Fiscal Balances and Public Indebtedness

25.	General government total outlays	265
26.	General government total tax and non-tax receipts	266
27.	General government financial balances	267
28.	General government cyclically-adjusted balances	268
29.	General government underlying balances	269
30.	General government underlying primary balances	270
31.	General government net debt interest payments	271
32.	General government gross financial liabilities	272
33.	General government net financial liabilities	273

Interest Rates and Exchange Rates

34. Short-term interest rates	274
35. Long-term interest rates	275
36. Nominal exchange rates (vis-à-vis the US dollar)	276
37. Effective exchange rates	277

External Trade and Payments

38. Export volumes of goods and services	278
39. Import volumes of goods and services	279
40. Export prices of goods and services	280
41. Import prices of goods and services	281
42. Competitive positions: relative consumer prices	282
43. Competitive positions: relative unit labour costs	283
44. Export performance for total goods and services	284
45. Shares in world exports and imports	285
46. Geographical structure of world trade growth	286
47. Trade balances for goods and services	287
48. Investment income, net	288
49. Total transfers, net	289
50. Current account balances	290
51. Current account balances as a percentage of GDP	291
52. Structure of current account balances of major world regions	292
53. Export market growth in goods and services	293
54. Import penetration	294

Other background Data

55. Quarterly demand and output projections	295
56. Quarterly price, cost and unemployment projections	297
57. Contributions to changes in real GDP in OECD countries	298
58. Household wealth and indebtedness	300
59. House prices	301
60. House price ratios	303
61. Maastricht definition of general government gross public debt	304
62. Macroeconomic indicators for selected non-member economies	305

Note: The adoption of national accounts systems has been proceeding at an uneven pace among OECD member countries, both with respect to variables and the time period covered. As a consequence, there are breaks in many national series. For further information, see table "National Accounts Reporting Systems, base years and latest data updates" at the beginning of the Statistical Annex.

Note: The adoption of national accounts systems has been proceeding at an uneven pace among OECD member countries, both with respect to variables and the time period covered. As a consequence, there are breaks in many national series. For further information, see table "National Accounts Reporting Systems, base years and latest data updates" at the beginning of the Statistical Annex. National accounts data do not always have a sectoral breakdown of investment expenditures, and for some countries data are estimated by the OECD.

Note: The adoption of national accounts systems has been proceeding at an uneven pace among OECD member countries, both with respect to variables and the time period covered. As a consequence, there are breaks in many national series. For further information, see table "National Accounts Reporting Systems - base years and latest data updates" at the beginning of the Statistical Annex.

1. Contributions to per cent change from the previous period, seasonally adjusted at annual rates.

Note: In so far as possible, the data have been adjusted to ensure comparability over time and to conform to the guidelines of the International Labour Office. Annual figures are calculated by averaging the monthly and/or quarterly estimates (for both unemployed and the labour force). Further information is available from OECD stat (<http://stats.oecd.org/index.aspx>), see the metadata relating to the harmonised unemployment rate.

Note: The adoption of national accounts systems has been proceeding at an uneven pace among OECD member countries, both with respect to variables and the time period covered. As a consequence, there are breaks in many national series. For further information, see table "National Accounts Reporting Systems, base years and latest data updates" at the beginning of the Statistical Annex.

Note: The adoption of national accounts systems has been proceeding at an uneven pace among OECD member countries, both with respect to variables and the time period covered. As a consequence, there are breaks in many national series. For further information, see table "National Accounts Reporting Systems, base years and latest data updates" at the beginning of the Statistical Annex.

Note: The adoption of new national account systems has been proceeding at an uneven pace among OECD member countries, both with respect to variables and the time period covered. As a consequence, there are breaks in many national series. See table "National Accounts Reporting Systems, base years and latest data updates" at the beginning of the Statistical Annex. Most countries report household saving on a net basis (i.e. gross saving minus consumption of fixed capital by households and unincorporated businesses). In most countries "household" refers to the household sector plus non-profit institutions servicing households (in some cases referred to as personal saving).

Note: The underlying balances are adjusted for the cycle and for one-offs. For more details, see Sources & Methods of the OECD Economic Outlook (<http://www.oecd.org/eco/sources-and-methods.htm>).

1. As a percentage of mainland potential GDP. The financial balances shown are adjusted to exclude net revenues from petroleum activities.
2. Revenues due to quantitative easing that have accumulated in a special fund for several years, and that will be transferred to the UK Treasury in well-identified instalments over the projection period, are treated as fiscal one-offs and excluded from underlying fiscal measures.

Note: Adjusted for the cycle and for one-offs, and excludes net interest payments. For more details, see Sources & Methods of the OECD Economic Outlook (<http://www.oecd.org/eco/sources-and-methods.htm>).

1. As a percentage of mainland potential GDP. The financial balances shown are adjusted to exclude net revenues from petroleum activities.

2. Revenues due to quantitative easing that have accumulated in a special fund for several years, and that will be transferred to the UK Treasury in well-identified instalments over the projection period, are treated as fiscal one-offs and excluded from underlying fiscal measures.

Note: Gross debt data are not always comparable across countries due to different definitions or treatment of debt components. Maastricht debt for European Union countries is shown in Annex Table 61.

Financial liabilities are measured at market value.

For more details, see Sources & Methods of the OECD Economic Outlook (<http://www.oecd.org/eo/sources-and-methods.html>).

1. Includes the debt of the Belgium National Railways Company (SNCE) from 2005 onwards.

2. Includes the debt of the Japan Railway Settlement Corporation and the National Forest Special Account from 1998 onwards.

3. Data are on a non-consolidated basis (SNA93).

Note: Net debt measures are not always comparable across countries due to different definitions or treatment of debt (and asset) components, see Sources & Methods of the OECD Economic Outlook (<http://www.oecd.org/eo/sources-and-methods.htm>). Financial liabilities are measured at market value.

1. Includes the debt of the Belgium National Railways Company (SNCB) from 2005 onwards.
2. Includes the debt of the Japan Railway Settlement Corporation and the National Forest Special Account from 1998 onwards.
3. Data are on a non-consolidated basis (SNA93).

Note: Three-month money market rates where available, or rates on similar financial instruments. For further information, see Sources & Methods of the OECD Economic Outlook (<http://www.oecd.org/eco/sources-and-methods.htm>). Individual euro area countries are not shown (after 2006 for Slovenia, 2007 for the Slovak Republic and 2010 for Estonia) since their short-term interest rates are equal to the euro area rate.

Note: 10-year benchmark government bond yields where available or yield on similar financial instruments (for Korea a 5-year bond is used). The long-term interest rates refer to yields in secondary bond markets and are not representative of average government funding costs. For more details, see Sources & Methods of the OECD Economic Outlook (<http://www.oecd.org/eo/sources-and-methods.htm>).

Note: Competitiveness-weighted relative consumer prices in dollar terms. Competitiveness weights take into account the structure of competition in both export and import markets of the goods sector of 51 countries. An increase in the index indicates a real effective appreciation and a corresponding deterioration of the competitive position. For details on the method of calculation, see Sources & Methods of the OECD Economic Outlook (<http://www.oecd.org/eco/sources-and-methods.htm>).

Note: Competitiveness-weighted relative unit labour costs for the overall economy in dollar terms. Competitiveness weights take into account the structure of competition in both export and import markets of the goods sector of 51 countries. An increase in the index indicates a real effective appreciation and a corresponding deterioration of the competitive position. For details on the method of calculation, see Sources & Methods of the OECD Economic Outlook (<http://www.oecd.org/economic-outlook>).

Note: Historical data for the OECD area are aggregates of reported balance-of-payments data of each individual country. Because of various statistical problems as well as a large number of non-reporters among non-OECD countries, trade and current account balances estimated on the basis of these countries' own balance-of-payments records may differ from corresponding estimates shown in this table.

1. National-accounts basis for OECD countries and balance-of-payments basis for the non-OECD regions.

2. Dynamic Asian Economies (Chinese Taipei; Hong Kong, China; Malaysia; Philippines; Singapore; Vietnam and Thailand), India and Indonesia.

3. Reflects statistical errors and asymmetries. Given the very large gross flows of world balance-of-payments transactions, statistical errors and asymmetries easily give rise to world totals (balances) that are significantly different from zero.

Note: The adoption of national accounts systems has been proceeding at an uneven pace among OECD member countries, both with respect to variables and the time period covered. As a consequence, there are breaks in many national series. For further information, see table "National Accounts Reporting Systems, base years and latest data updates" at the beginning of the Statistical Annex.

Note: The adoption of national accounts systems has been proceeding at an uneven pace among OECD member countries, both with respect to variables and the time period covered. As a consequence, there are breaks in many national series. For further information, see table "National Accounts Reporting Systems, base years and latest data updates" at the beginning of the Statistical Annex.

1. For the United Kingdom, the euro area countries and the euro area aggregate, the Harmonised Index of Consumer Prices (HICP) is used.

Note: For the period before 2014, gross debt figures are provided by Eurostat, the Statistical Office of the European Communities, unless more recent data are available, while GDP figures are provided by national authorities. This explains why these ratios can differ significantly from the ones published by Eurostat. For the projection period, debt ratios are in line with the OECD projections for general government gross financial liabilities and GDP.
