Note: A high GTRIC-p score signals a product category that is more likely to be counterfeit – that is to say, it contains high values for counterfeit products, or a large share of Swedish sales in that product category is counterfeit. Figures in parenthesis are Harmonized System (HS) codes as defined by the United Nations Trade Statistics (UN Trade Statistics, 2017). GTRIC-p values are zero for HS categories not displayed in this table.

Note: A high GTRIC-e score indicates that an economy is highly prone to be a destination market for counterfeit products infringing Swedish trademarks and patents, either in absolute terms or as a share of Swedish sales.

Note by Turkey: The information in this document with reference to “Cyprus” relates to the southern part of the Island. There is no single authority representing both Turkish and Greek Cypriot people on the Island. Turkey recognises the Turkish Republic of Northern Cyprus (TRNC). Until a lasting and equitable solution is found within the context of the United Nations, Turkey shall preserve its position concerning the “Cyprus issue”.

Note by all the European Union Member States of the OECD and the European Union: The Republic of Cyprus is recognised by all members of the United Nations with the exception of Turkey. The information in this document relates to the area under the effective control of the Government of the Republic of Cyprus.

Note: A high GTRIC-p score implies either that a given product category contains high values of Swedish trademarks or patents that are sensitive to global counterfeiting and piracy in absolute terms (e.g. in euros); or, that a large share of the production of goods associated with a Swedish trademark or patent registered in this product category is counterfeit or pirated. Figures in parenthesis are Harmonized System (HS) codes as defined by the United Nations Trade Statistics (UN Trade Statistics, 2017). Values are zero for HS categories not displayed in this table.
