

## ANNEX B

*Telephone interviews on secondary use of health data*

The OECD conducted a series of telephone interviews with individuals identified within the country questionnaire responses as persons to contact to either discuss the country's current capacity to undertake health studies requiring the analysis and linkage of personal health data for public health and health services research or to discuss a specific project. In some cases, the same individual provided information on both the general environment and a specific project.

**Table B.1. Countries that responded to the 2011-12 HCQI telephone interview on secondary use of health data**

Country	Participants in a telephone interview
Australia	Phil Anderson, Head, Data Linkage Unit, Australian Institute of Health and Welfare
