

United Kingdom

The United Kingdom remains an important destination country for international migration flows as well as experiencing high levels of emigration by its own citizens. In 2006, the estimated number of people arriving to live in the UK for at least a year was 591 000, with an estimated 400 000 people leaving the UK giving a net gain of 191 000. There was a net gain of 71 000 citizens from the Eastern Europe states which joined the EU on 1 May 2004 (A8). The inflows of workers from the A8 countries, which were granted access to the UK labour market, have remained fairly steady since accession. 218 000 citizens of these countries registered under the Worker Registration Scheme between June 2006 and June 2007, in keeping with the annual average for the previous two years. More than two-thirds of these were Poles, with Lithuanians and Slovaks the next largest groups. Indeed, Poles are now the largest group of foreign citizens, with 406 000 (292 000 working) in 2007. The total number of A8 citizens was 587 000, of whom 409 000 were working, a much higher proportion than among the native-born.

The significant inflows of A8 citizens led the United Kingdom to impose a transitional period on citizens of Romania and Bulgaria following their entry into the EU on 1 January 2007.

Work permit approvals for non-EEA citizens totalled 141 000 in 2006, with computer services (about 22%) and health and medical services (about 18%) the main beneficiaries. Indians were the largest national group receiving work permits, accounting for 37% of the total approved. Indians also accounted for more than 40% of the about 22 000 entries under the Highly Skilled Migrant Programme.

The number of asylum applications declined 8% to 28 000 in 2006. 85% were made by people who had already entered the United Kingdom rather than at a port of entry.

In the policy domain, the main structural changes were the creation within the Home Office of the Border and Immigration Agency (BIA) and of two new advisory committees, the Migration Advisory Committee (MAC) and the Migration Impacts Forum (MIF). The BIA replaces the Immigration and Nationality Directorate and is intended to grant

greater operation freedom while increasing accountability and clarifying responsibility.

The Migration Advisory Committee (MAC), composed of independent experts, is to identify labour market shortage areas where immigration might ease skill gaps. It will produce a biannual shortage occupation list starting in August 2008. The Migration Impacts Forum (MIF), active since the summer of 2007, assesses the wider, more qualitative, social implications of immigration.

The main reform in the UK is the ongoing introduction of a Points Based System (PBS) for labour migration. The five tiers into which the system is divided are being gradually implemented. Tier 1 (highly qualified) was implemented in the first quarter of 2008, to replace the former Highly Skilled Migrant Programme. At the same time, the register for employers who wish to sponsor labour migrants has been opened in preparation for the implementation of the sponsored tiers (that is, tiers 2 and 5) later in the year.

Tier 2 (for skilled workers with a job offer, religious workers, athletes and intra-company transferees) and Tier 5 (youth mobility and certain temporary workers) will become operational in the third quarter of 2008. Finally, Tier 4 (students) will commence in the first quarter of 2009. Some of the prior channels for migration will be integrated into the system (*e.g.* entrepreneurs and investors) while others, such as domestic workers, will be closed. Tier 3, intended for lower-skilled migrants, will not be activated. Existing seasonal and lower-skilled work programmes are open exclusively to Romanians and Bulgarians.

In February 2008, the Government published a proposal for a three stage route to citizenship, including a new probationary period between temporary and permanent residence or citizenship. Full access to benefits will be delayed until completion of the probationary period. To finance transitional impacts of migration on the provision of public services, fees increases for certain immigration applications are envisaged. Migrants who tend to consume more in public services – such as children and elderly relatives – are expected to pay more than others.

HOW TO READ THE TABLES OF PART IV

Annual averages have been calculated for most of the series presented. The averages cover the periods 1995-2000 and 2001-2006. In some cases, depending on the availability of data, they may be calculated for shorter periods.

Sources and notes

Migration flows of foreigners

Sources and notes are available in the Statistical Annex (metadata related to Tables A.1.1. and B.1.1.)

Long-term migration inflows of foreigners by type

The statistics are based largely on residence and work permit data and have been standardised, to the extent possible (cf. www.oecd.org/els/migration/imo2008).

Temporary migration

Based on residence or work permit data. Data on temporary workers generally do not cover workers who benefit from a free circulation agreement.

Inflows of asylum seekers

United Nations High Commission for Refugees.

Macroeconomic and labour market indicators

Real GDP and GDP per capita

Annual National Accounts – Comparative tables at the price levels and PPPs of 2000.

Employment and unemployment

Employment Outlook, OECD, 2007. Some series appearing in the latter have been revised since they were published.

Components of population growth

Labour Force Statistics, OECD, 2007.

Total population

Foreign-born population

National sources and Secretariat estimates (cf.: www.oecd.org/els/migration/imo2008 for more information on methods of estimation). Sources and notes of national sources are provided in the Statistical Annex (see metadata for Tables A.1.4 and B.1.4).

Foreign population

National sources. Exact sources and notes are given in the Statistical Annex (metadata related to Tables A.1.5 and B.1.5).

Naturalisations

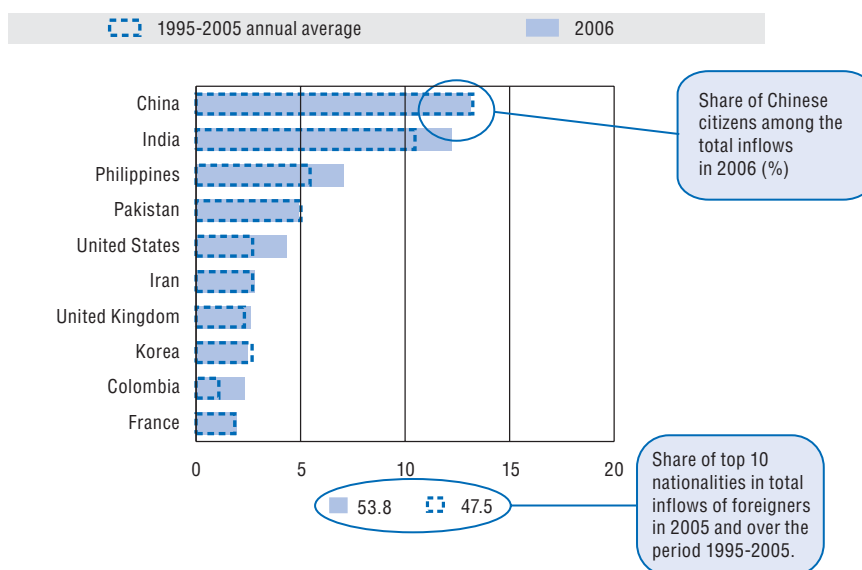

National sources. Exact sources and notes are given in the Statistical Annex (metadata related to Tables A.1.6 and B.1.6).

Labour market outcomes

European countries: European Union Labour Force Survey (data provided by Eurostat) except for Denmark (Population Register data except since 2005 where data refer to the European Union Labour Force Survey); Australia: Labour Force Survey; Canada: Survey of Labour and Income Dynamics; United States: Current Population Survey, March supplement.
